Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-61 are presented for examination.

Election/Restrictions

2. Restriction to one of the following is required under 35 U.S.C. 121:
 - I. Claims 1-12, 16, and 18-41 are drawn to a communication system and method to execute an application from a resident web server by a resident browser, classified in class 709, subclass 203.
 - II. Claims 13-15 and 49-54 are drawn to a communication system and method for deploying a file to a remote communication device, classified in class 709, subclass 236.
 - III. Claims 42-48 are drawn to a method for storing session and application data as objects, classified in class 709, subclass 237.
 - IV. Claims 55-61 are drawn to a communication method for generating an application for use on a handheld communication device, classified in class 709, subclass 229.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method to execute an application from a resident web server by a resident browser. Invention II allows for deploying a file

to a remote communication device. Invention III allows for storing session and application data as objects. Invention IV allows for generating an application for use on a handheld communication device, classified in class 709. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Eric J. Hanson on August 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
